PROFILE SUMMARY

Motivated Computer Science undergraduate (4th semester, University of Agriculture, Faisalabad) with around one year of hands-on coding experience. Skilled in building responsive, modern web interfaces with React.js, and comfortable working across the stack with basic Node.js backend knowledge. Has independently designed and deployed multiple live web applications, including an anime browsing platform, an e-commerce storefront, and an AI-powered assistant. Eager to contribute front-end development skills to a professional team and grow as a full-stack developer.

WORK EXPERIENCE

Self-Directed Web Developer (~1 Year)

- Built and deployed multiple front-end web applications using React.js, HTML, and CSS.
- Practiced backend fundamentals with Node.js to connect front-end applications to APIs and data.
- Used Git and GitHub for version control across personal projects.
- Deployed live projects on Vercel for public access and portfolio demonstration.

PROJECTS

Anime Explorer Website (React.js)

- Developed a full-featured anime browsing and discovery website using **React.js**, with **React Router** used to handle multi-page navigation and routing between different anime listing and detail views.
- Consumed a public anime API using the **Fetch method** to retrieve and display live anime data, including search results and details.
- Used multiple **React Hooks** (useState, useEffect, and others) to manage component state, side effects, and API data flow.
- Designed a clean, responsive, and visually appealing **graphic user interface** using **Tailwind CSS**.
- Deployed the project on **Vercel** for public access.

Live Demo: <https://anime-explorer-website.vercel.app>

Hadi AI — AI Chat Assistant (React.js)

- Built a front-end conversational AI assistant, similar to ChatGPT, that accepts user commands/prompts and generates intelligent responses.
- Integrated **Groq's free API** using a generative AI package to power the assistant's response generation.
- Styled the entire interface with **Tailwind CSS** for a clean, modern chat experience.

Live Demo: <https://hadi-ai-assistant-pro.vercel.app>

E-Commerce Frontend (React.js)

- Built a React.js e-commerce storefront featuring product listings, cart functionality, and a fully responsive shopping UI.
- Integrated a free public API to fetch and display product data dynamically.
- Styled the storefront using **Tailwind CSS** for a modern, mobile-first shopping experience.

CORE SKILLS

Programming Languages: JavaScript (ES6+), HTML5, CSS3

Frameworks & Libraries: React.js, React Router

Styling: Tailwind CSS

Environment: Node.js (Basics)

Developer Tools: Git, GitHub, VS Code, Vercel

Certification

Front-End Development — React.js

EDUCATION

BS Computer Science — University of Agriculture, Faisalabad

Currently enrolled — completed 4th Semester

Intermediate (F.Sc.) — Punjab College, Okara

Marks: 1056 / 1200
